

This addition to our block list for Phishing Scam sites was detected and validated by researchers at PhishTank.com on Jan 27, 2012. There were the usual scam sites from Australian, Chinese, South American, US & Western European IP Geolocations. The IP Addresses of each URL in this list were mapped by DNS or reverse DNS methods against each domain name label. The result of this effort was traced by each line item and then submitted to an IPGeolocation service provided by IPLigence. End users are cautioned to avoid the URLs in this list. ISPs and Search Engine providers are encouraged to review entries for their respective domains and ensure that their clients are following their respective Internet Use Policies. Thanks again to the researchers at PhishTank for the excellent work they do on a daily basis to detect Internet fraudulent and malicious websites.
