

Description

nGran™ offers a Site Recovery Planning service that provides security policies and procedures with disaster recovery and emergency planning, remote backup / recovery support, temporary site relocation, and on-site CERT services and IT systems recovery. Preparation for, response to, and recovery from a disaster affecting the IT administrative functions of any company requires the cooperative efforts of many support organizations in partnership with the functional areas supporting the business. The deliverable that you receive is a recovery plan document that outlines and coordinates these efforts, reflecting the analysis and input from representatives of the affected organizations.

Features and Benefits

The Site Recovery Planning efforts are designed to gather data that is used to analyze the information needs of an entire organization. The Recovery Planning document is structured around the following sections:

- Site recovery strategy
- Recovery team composition, including required skills to implement
- Computer emergency response team operating procedures
- Backup site preparation, including outsourced options
- Disaster alert procedure development
- Mission critical applications risk analysis
- Critical data migration planning
- Testing the recovery plan components
- Preventive controls
- Team evaluation following a recovery operation

Service Provider of Choice

nGran™ supports current and emerging standards for security authentication technologies. We employ security experts with extensive backgrounds in building and managing secure systems and networking environments. We use industry best practices and state-of-the-art tools to find and correct the most intractable data security problems.
